Devices to Leverage Digital Curriculum

"A meaningful instructional tool at the fingertips of every child"

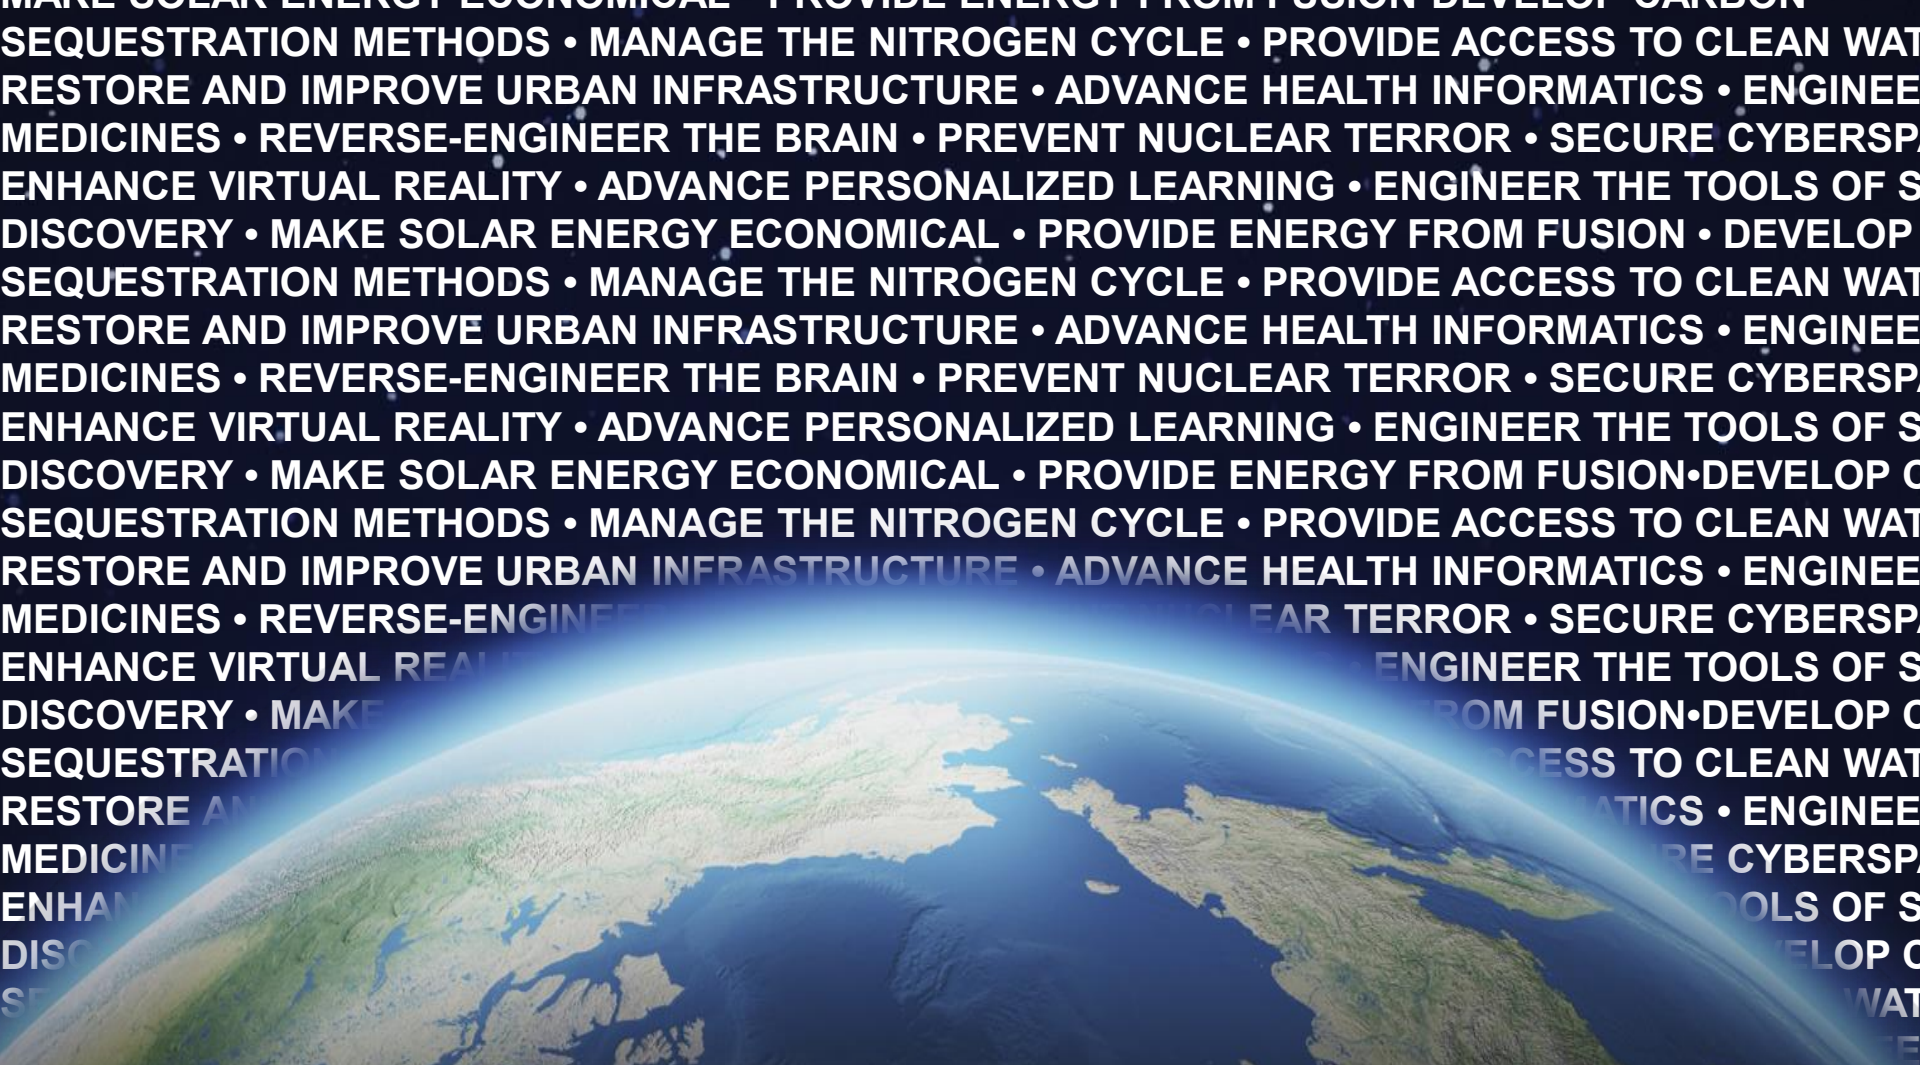

In reading, *Rethinking Education in the Age of Technology* by Allan Collins and Richard Halverson, I came across quotes that every educator MUST hear. They are reproduced from the work of Dave Thornburg and David Dwyer.

- From a principal's publication in 1815: "Students today depend on paper too much. They don't know how to write on a slate without getting chalk dust all over themselves. They can't clean a slate properly. What will they do when they run out of paper?"
- From the journal of the National Association of Teachers, 1907: "Students today depend too much on ink. They don't know how to use a knife to sharpen a pencil. Pen and ink will never replace the pencil."
- From *Rural American Teacher*, 1928: "Students today depend on store bought ink. They don't know how to make their own. When they run out of ink they will be unable to write words or ciphers until their next trip to the settlement. This is a sad commentary on modern education."
- From *Federal Teachers*, 1950: "Ballpoint pens will be the ruin of education in our country. Students use these devices then throw them away. The American values of thrift and frugality are being discarded. Businesses and banks will never allow such expensive luxuries."

OAK RIDGE SCHOOLS
THE PREMIER PRE K-12
STEM DISTRICT

Workforce in STEM:

America is only graduating 1/5th of the STEM workforce needed

1 Million STEM Jobs will be opened by 2018. The United States is projected to only graduate 200,000 in the STEM workforce.

STEM Vision for Oak Ridge Schools “Premier STEM District (preK-12) in the Nation”

The purpose of the STEM Initiative is to enhance the teaching and learning environment in the Oak Ridge Schools and place Science, Technology, Engineering and Mathematics tools in the hands of teachers and students. Preparing students for the 21st century and creating global citizens, collaborators and critical thinkers is at the foundation of this initiative.

Post-Professional Development Report

Oak Ridge Schools, TN

April 4th - 16th, 2014

Professional Development Session Overview

Course: *Getting Started with Discovery Education Science Techbook*

Description: Let's get started! Participants will be immersed in the 5E's of Inquiry model of science instruction, the framework of the Science or Social Studies Techbook, to promote deeper levels of science understanding. Participants will be introduced to features of the Techbook and effective instructional strategies for using digital content in science so that they may immediately start planning and implementing the content into their classrooms.

Course: *Integrating Discovery Education Streaming PLUS*

Description: Transform teaching and learning with Discovery Education Streaming Plus, an innovative instructional resource designed to support the transition to Common Core State Standards. Participants will be immersed in Discovery Education's extensive streaming library of rich and engaging media that spans all curriculum areas. This course is designed to demonstrate how DE streaming supports multiple learning modalities with content that is easy to integrate, aligned to standards, and always current. Participants will learn how to search for content based on tags, including state standards, keywords, media types, grade levels, and more and seamlessly link lesson objectives to digital media. In addition, exemplar Common Core lessons will be discussed and explored for easy use and adaptation the classroom, and participants will have the opportunity to experience a piece of the model lesson taught by the DE specialist.
